

PRANESH M

+91 8438371209 | praneshm8438@gmail.com | linkedin.com/in/praneshm | github.com/praneshm | Dindigul, Tamil Nadu

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate (2023–2027) with hands-on experience building full-stack web applications, machine learning models, and IoT systems. Proficient in React.js, Node.js, Express.js, MongoDB, and Python. Completed an industry internship delivering data science solutions for a health-tech use case. Recognised in 6+ national-level technical competitions. Passionate about UI/UX design and scalable software architecture.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering *August 2023 – May 2027*
PSAN College of Engineering and Technology, Dindigul, Tamil Nadu

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript (ES6+)

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, Java Application Development

Databases: MongoDB (NoSQL), MySQL (Relational)

Data Science & Analytics: Machine Learning, Power BI, Data Visualization, Predictive Modeling

IoT & Cloud: ESP32, IoT Sensors, Google Firebase

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code, Microsoft Power BI

WORK EXPERIENCE

Data Science and Analytics Intern | Pydun Technology Pvt. Ltd., Madurai *May 2025 – Present*

- Developed and evaluated 3+ supervised machine learning models for heart rate prediction, achieving improved accuracy through feature engineering and 5-fold cross-validation.
- Built 2 interactive Power BI dashboards visualising heart rate trends across 1,000+ data points, enabling real-time health analytics for end users.
- Preprocessed and cleaned health datasets comprising 5,000+ records, reducing data inconsistencies by approximately 30% to ensure high-quality model inputs.

PROJECTS

Task Management and Productivity Application | *React.js, Node.js, Express.js, MongoDB* Jan 2025 – Apr 2025

- Architected and delivered a full-stack MERN application with 5+ core modules (task creation, priority tagging, progress tracking, deadline alerts, and dashboard analytics).
- Designed 10+ RESTful API endpoints with Express.js and MongoDB, supporting full CRUD operations with sub-200 ms average response time.
- Implemented a responsive, mobile-first UI in React.js, reducing layout-related user friction across 3 device form factors.

Interactive Quiz Web Application | *HTML5, CSS3, JavaScript, React.js, Node.js* Sep 2024 – Dec 2024

- Developed a browser-based quiz platform supporting 50+ multiple-choice questions with real-time score calculation and end-of-quiz result tracking.
- Optimised React state management to reduce unnecessary re-renders by an estimated 40%, improving UI responsiveness on low-end devices.

Smart Sanitation Monitoring System using IoT | *ESP32, IoT Sensors, Firebase, React.js, Node.js* Jan 2026 – May 2026

- Built an end-to-end IoT solution using ESP32 microcontrollers and 4+ sensor types to monitor sanitation hygiene levels in real time across multiple zones.

- Integrated Google Firebase as the cloud backend, enabling live data ingestion at 1-minute intervals and real-time alerts via a React.js monitoring dashboard.

ACHIEVEMENTS AND AWARDS

- First Prize — GAYAN MITRA'25 national technical competition
- Second Prize — INFINITY 2k25 technical event
- Top 10 with Cash Prize — Paper Presentation competition
- Top 25 — National Level IDEATHON
- Shortlisted — CICADA'25 Hackathon
- Participated — GDG Hackathon
